Help and Support Resources

If you have questions that are not covered in this guide, or if you would like to report errors in the documentation, please contact your Pentaho technical support representative.

Support-related questions should be submitted through the Pentaho Customer Support Portal at <http://support.pentaho.com>.

For information about how to purchase support or enable an additional named support contact, please contact your sales representative, or send an email to sales@pentaho.com.

For information about instructor-led training on the topics covered in this guide, visit <http://www.pentaho.com/training>.

Limits of Liability and Disclaimer of Warranty

The author(s) of this document have used their best efforts in preparing the content and the programs contained in it. These efforts include the development, research, and testing of the theories and programs to determine their effectiveness. The author and publisher make no warranty of any kind, express or implied, with regard to these programs or the documentation contained in this book.

The author(s) and Pentaho shall not be liable in the event of incidental or consequential damages in connection with, or arising out of, the furnishing, performance, or use of the programs, associated instructions, and/or claims.

Trademarks

Pentaho (TM) and the Pentaho logo are registered trademarks of Pentaho Corporation. All other trademarks are the property of their respective owners. Trademarked names may appear throughout this document. Rather than list the names and entities that own the trademarks or insert a trademark symbol with each mention of the trademarked name, Pentaho states that it is using the names for editorial purposes only and to the benefit of the trademark owner, with no intention of infringing upon that trademark.

What's New in 4.4?.....4

What's New in 4.4?

There are several major changes between Pentaho Data Integration 4.3 and 4.4.

PDI Operations Mart

- **The new PDI Operations Mart enables administrators to collect and query PDI log data into one centralized data mart for easy reporting and analysis.**
 - The operations mart has predefined samples for Pentaho Analyzer, Interactive Reporting, and Dashboards. Individualized reports can be self-crafted.
- Sample inquiries include
- How many jobs/transformations have been successful vs. failed in a given period?
 - How many jobs/transformations are currently running?
 - What are the longest running jobs or transformations in a given period?
 - What is the highest failure rate of job/transformations in a given period?
 - How many rows have been processed in a particular time period? This allows you to see a trend of rows/time in time series for selected transformations.
 - The operations mart provides setup procedures for MySQL, Oracle, and PostgreSQL databases.
 - Install instructions for the PDI Operations Mart are available in the Pentaho InfoCenter.

New Concat Fields Step

- **The Concat Fields step is used to concatenate multiple fields into one target field.**
 - The fields can be separated by a separator and the enclosure logic is completely compatible with the **Text File Output** step.
 - This step is very useful for concatenation of fields as key/value pairs for the Hadoop **MapReduce Output** step.

New SAS Input Step

- **The new SAS Input step reads files in sas7bdat format created by SAS software.**
 - This new step allows PDI developers to import files in sas7bdat format.

New EDI to XML Step

- **The EDI to XML step converts EDI message text, which conforms to the ISO 9735 standard, to generic XML.**
 - The XML text is more accessible and allows for selective data extraction using XPath and the **Get Data From XML** step.
